CAREER SUMMARY

Associate software engineer with 1+ year of experience building, debugging, and optimizing responsive, component-based web applications across the full stack (JavaScript/TypeScript, React.js, Next.js, Node.js, Express.js). Familiar with Angular fundamentals and modern web development practices. Skilled in REST API integration, state handling, Git/GitHub workflows, GitHub Actions CI/CD, code reviews, and Agile/Scrum collaboration; focused on clean, maintainable, secure, high-performance software.

TECHNICAL SKILLS

Version Control & Collaboration: Git, GitHub (branching, pull requests, code review, merge conflict resolution), GitHub Actions, CI/CD pipelines, Agile/Scrum

Testing & Code Quality: Jest, Karma/Jasmine (familiarity), Postman API validation, error handling, cross-layer debugging (frontend, backend, database)

Languages & Frontend: Angular (component-based architecture), JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS, React.js, Next.js (SSR/SSG, App Router), TanStack Query (React Query), Redux Toolkit

Backend & APIs: Node.js, Express.js, RESTful API design & integration, JWT/OAuth, middleware

Databases: MongoDB & Mongoose, PostgreSQL, MySQL, Prisma ORM, schema design, Redis

Cloud & DevOps: AWS (EC2, S3, RDS, IAM, CloudWatch), Docker, CI/CD

PROFESSIONAL EXPERIENCE

Software Developer — Sparkradix Technologies Pvt. Ltd 2025 – Present

Contribute to production React.js/Next.js applications and backend services; collaborate in Agile/Scrum teams, open and review pull requests, and resolve merge conflicts to keep releases reliable.

- Debug and optimize frontend, backend, and database code; validate REST APIs with Postman and resolve defects before release.
- Design and implement RESTful APIs with Express.js, integrating relational (MySQL, PostgreSQL via Prisma) and NoSQL (MongoDB) data layers.
- Build reusable, responsive, cross-browser UI components and dynamic templates using semantic HTML5, CSS3/SCSS, JavaScript, and TypeScript.
- Collaborate with cross-functional teams to translate requirements into shippable features and incorporate code-review feedback to improve maintainability, security, and performance.

PROJECTS

Intelligent Customer Relationship & Workflow Management System

- Built an AI-powered CRM and business automation platform with React.js, TypeScript, Node.js, Express.js, Prisma, PostgreSQL/AWS RDS, Redis, Tailwind CSS, and role-based access control for lead tracking and sales workflows.
- Integrated TanStack Query (React Query) for backend REST API fetching, caching, mutations, invalidation, and loading/error state handling; used Redux Toolkit for client-side UI state and integrated WhatsApp Business API plus Gmail/Zoho Mail.

Expense Tracking Web Application & Role-Based Access HRMS Web Application

- Built an expense platform with React.js, Redux Toolkit, Express.js, PostgreSQL, AI-powered auto-categorization, and Redis-based OTP authentication.
- Built a scalable HRMS platform with RBAC for employee, attendance, leave, and payroll management, optimized with Redis caching and Docker.

EDUCATION

Master in Computer Application — Gandhi Engineering College

CGPA: 8.38 | 2023 – 2025

Bachelor in Computer Application — BCCM College, Berhampur University

Score: 79% | 2020 – 2023

COURSES & CERTIFICATIONS

Full Stack Software Development (MERN Stack) — Tetratrin Technologies Pvt. Ltd. (Sept 2024 – Apr 2025)

Full Stack Development · RESTful API & Backend Architecture · System & Database Design · Frontend Testing & Collaboration
